

Master of Public Health in: Health Systems & Quality Management

Chairmen:

Dr. Ahmad Al Amry

Chairman, Health Systems & Quality Management
Director, Quality Management

Introduction

The Master's program in Health Systems & Quality Management aims to overcome the shortage of qualified capabilities in the field of health systems management and quality assurance management. Graduates of the program shall contribute to the development and application of quality assurance and hospital and health systems management in various healthcare services and facilities.

The College of Public Health and Health Informatics offers this degree to the international standards in the specialty with a view to becoming the national and regional centre for health systems & quality management.
