

Master of Public Health in: Public Health

Chairman:

Dr. Ali Al Shehri, MD, PRCGP
Chairman, Department of Public Health

Introduction

The Master's program in Public Health aims to overcome the severe shortage of qualified capabilities in the field of public health. Graduates of the program shall contribute to the development and application of basics of public health at hospitals, health centers, and in the community, and solve the problems that may stand in the way of the advancement of public health and its utilization.

The College of Public Health and Health Informatics offers this degree to the international standards in the specialty with a view to becoming the national and regional centre for public health advancement.
